SUBJECT INDEX

Adherence of patients to programs
  promotion in home spirometry research program, 36
  with stepping modes to improve fitness and function, 49
Administrative issues
  in changing nursing management structures, 45
  and experience of nurses working with unlicensed assistive personnel, 101
  in measurement and management of outcomes, 93
  and recruitment barriers in rural community hospitals, 183
Advanced practice nurses, credentialing and privileging of, 99
Aging
  comparison of predictive models for delirium in, 27
  and health problems in older adults, 138
  and humor and well-being in caregivers for patients with Alzheimer disease, 12
Alzheimer disease patients
  behavior during therapeutic activities, 167
  caregivers for, humor and well-being in, 12
American Organization of Nurse Executives (AONE)
  changes in nursing management structures, 45
  outcomes measurement and management, 93
Anger and blood pressure in children, 2
Arthritis, and responses to osteoarthritis affected by socioeconomic status, 19

Behavior
  in late-stage dementia during therapeutic activities, 167
  in type II diabetes during contingency contracts, 77
Blood pressure and anger in children, 2
Breastfeeding duration, interventions for increase in, 190
Buffum Caregiver Humor Use Assessment Tool (BCHUAT), 12

Caregivers for patients with Alzheimer disease, humor and well-being in, 12
Children, anger and blood pressure in, 2
Clinical trials, recruitment of women for, 148
Contingency contracts, and behavior in type II diabetes, 77
Credentialing of advanced practice nurses, 99

Delirium, comparison of predictive models for, 27
Dementia patients
  behavior during therapeutic activities, 167
  caregivers for, humor and well-being in, 12
Diabetes mellitus, type II, and behavior during contingency contracts, 77
Diaries of health problems in older adults, 138
Diet
  behavior in type II diabetes during contingency contracts, 77
  and triggers of overeating by overweight women, 69
Dressings for split-thickness skin graft donor sites, comparison of, 174
Drug studies, and recruitment of women for clinical trials, 148

Ear thermometers, accuracy of, 158
Editorials, 1, 47, 99, 157
Exercise
  behavior in type II diabetes during contingency contracts, 77
  and stepping modes to improve fitness and function, 49

Faces Pain Scale, reliability and validity of, 84
Falls in a psychiatric unit, 115
Fatigue, and interventions to increase breastfeeding duration, 190

Gender, and anger and blood pressure in children, 2
Genesis center for prenatal care, 55

Health problems in older adults, 138
Home care, and adherence of patients to spirometry research program, 36
Hospital nursing research committees, attitudes toward, 122
Hospitalized patients
  delirium in, comparison of predictive models for, 27
  falls in a psychiatric unit, 115
Humor and well-being in caregivers for patients with Alzheimer disease, 12
Hypertension, and anger in children, 2

Infants
  interventions to increase breastfeeding duration, 190
  pain assessment in, 62
Infection in split-thickness skin graft donor sites, 177
Infrared ear thermometry, accuracy of, 158
Integrative reviews of research, utilization-focused, 195
Interest groups, and integration of research into practice settings, 152
Interventions
  comprehensive care affecting pregnancy outcomes, 55
  to increase breastfeeding duration, 189
  in overeating episodes of overweight women, 69
  stepping modes to improve fitness and function, 49

Lung transplantation, and adherence of patients to home spirometry research program, 36
Lupus erythematosus, quality of life in, 130

Management structures in nursing, changes in, 45
Media attention, and research shared with reporters, 157
Medical Outcome Study Mental Health Index (MOS), 14

Newsletters promoting nursing research, 41
Nursing
  attitudes toward hospital nursing research committees, 122
  consumer attitudes toward, 47
  and role of media, 157
  credentialing and privileging of advanced practice nurses, 99

experience of working with unlicensed assistive personnel, 101
and integration of research into practice settings, 152
management structures in, 45
processes involved in infant pain assessment, 62
recruitment barriers in rural community hospitals, 183
Nursing home therapeutic activities, participation by people with late-stage dementia, 167

Osteoarthritis, socioeconomic status affecting responses to, 19
Osteoporosis, women's knowledge of, 111
Outcomes
in interventions to increase breastfeeding duration, 190
measurement and management of, 93
in pregnancy, comprehensive care affecting, 55
Overeating by overweight women, triggers of, 69

Pain
assessment in infants, 62
in split-thickness skin graft donor sites, 177
validity of Faces Pain Scale, 84
Pediatric Anger Expression Scale (PAES), responses to, 2
Pediatric Anger Scale (PANG), responses to, 2
Peer review of research, 90
Pregnancy outcomes affected by comprehensive care, 55
Privileging of advanced practice nurses, 99
Psychiatric unit, risk factors for falls in, 115

Quality of life in lupus erythematosus, 130

Race, and anger and blood pressure in children, 2
Recruitment
of nurses for rural community hospitals, barriers in, 183
of women for clinical trials, 148
Research
accuracy of ear thermometers, 158
adherence of patients to home spirometry research program, 36
Alzheimer's caregivers well-being and humor, 12
anger and bloood pressure in children, 2
attitudes toward hospital nursing research committees, 122
behavior in type II diabetes during contingency contracts, 77
benefits of, 1
changes in nursing management structures, 45
comparison of split-thickness skin graft donor site dressings, 174
delirium prediction in, comparison of models for, 27
experience of nurses working with unlicensed assistive personnel, 101
falls in a psychiatric unit, 115
health problems in older adults, 138
integration into practice settings, 152
integrative reviews of, utilization-focused, 195
media attention to, 157
pain assessment in infants, 62
participation in therapeutic activities in late-stage dementia, 167
peer review in, 90
pregnancy outcomes after comprehensive care, 55
promotion through newsletters, 41
quality of life in lupus erythematosus, 130
recruitment of women in clinical trials, 148
socioeconomic status affecting responses to osteoarthritis, 19
stepping modes to improve fitness and function, 49
triggers of overeating by overweight women, 69
validity of Faces Pain Scale, 84
women's knowledge of osteoporosis, 111
Risk factors
comparison of predictive models for delirium development, 27
for falls in a psychiatric unit, 115
Rural community hospitals, recruitment barriers in, 183

Skin grafts, split-thickness, and comparison of donor site dressings, 174
Socioeconomic status
and pregnancy outcomes after comprehensive care, 55
and responses to osteoarthritis, 19
Spirometry research program, home-based, adherence of patients to, 36
Stepping modes to improve fitness and function, 49

Temperature measurements, and accuracy of ear thermometers, 158
Transplantation of lung, and adherence of patients to home spirometry research program, 36

Utilization of research, integrative reviews of, 195

Vascular disease, and stepping modes to improve fitness and function, 49

Weight, and triggers of overeating by overweight women, 69
Well-being
and humor in caregivers for patients with Alzheimer disease, 12
and quality of life in lupus erythematosus, 130
Women
interventions to increase breastfeeding duration, 190
knowledge of osteoporosis, 111
overweight, triggers of overeating by, 69
pregnancy outcomes affected by comprehensive care, 55
recruitment in clinical trials, 148
Wound healing, and comparison of split-thickness skin graft donor site dressings, 174
